

# Series OXI/B

## Modular rings biological discs plants for 50 to 500 equivalent people.

### Technical specifications

Supply of a prefabricated concrete biological treatment plant type EMS WATER TECHNOLOGY series OXI/B, composed of a highly resistant concrete modular rings primary sedimentation tank to be sealed on site, a monobloc concrete tank to contain the biological discs with a gearbox and fiberglass cover. The supply also includes the highly resistant concrete modular rings final sedimentation tank to be sealed on site with a recycling system to the head of the plant, electrical control and protection panel of all the devices.

DESCRIPTION	MEASURE UNIT	MODEL

The values stated are just for information. EMS WATER TECHNOLOGY retains the right to change them at any time.

The plants may be supplied with different hydraulic flow rates and organic loads than those indicated in the table, which are 200 l/ab. day. and di 60 g BOD5/ab.day
